

# Louisiana

## 2016 CHIP Fact Sheet

For nearly two decades the Children’s Health Insurance Program (CHIP) has provided health coverage to children in families with low to moderate income. Each state has the option to cover its CHIP population within its Medicaid program, design and structure a separate CHIP program, or establish a combination program using both options.

The Affordable Care Act (ACA) extended federal CHIP funding through fiscal year 2015,

required states to maintain Medicaid and CHIP eligibility standards for children through 2019, and increased the federal CHIP matching rate by 23 percentage points.<sup>1</sup> The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) extended federal CHIP funding at its current levels through September 2017.<sup>2</sup>

**Participation Rate:** 92.6% of eligible children in Louisiana participated in either Medicaid or LaCHIP in 2014, the last year for which we have national data. The national average was 91% in 2014.<sup>3</sup>

**Eligibility Levels:** States establish CHIP eligibility levels within federal rules. Under the ACA’s maintenance of effort requirement, they must maintain CHIP eligibility levels they had in place when ACA was enacted until September 30, 2019. Beginning in 2014, eligibility levels for CHIP were revised based on [Modified Adjusted Gross Income \(MAGI\)](#).

**Key Highlights:**

**Program Type:** Louisiana operates a combination CHIP program, called LaCHIP.

**Number of Children Covered:** In FY2014, 136,263 children were covered by LaCHIP.\*

**State’s Enhanced Federal Match Rate:** For FY2017, the federal match is 96.60%.

*\*Data from Medicaid and CHIP Payment and Access Commission Dec. 2015 MACStats report.*

Modified Adjusted Gross Income (MAGI) Eligibility Levels for CHIP/Title XXI in Louisiana (by Age Group) in 2016			
	Ages 0 – 1	Ages 1 – 5	Ages 6 – 18
<b>Medicaid Expansion</b>	142-212% FPL	142-212% FPL	108-212% FPL
<b>Separate CHIP Program</b>	213-250% FPL	213-250% FPL	213-250% FPL

Source: Medicaid and CHIP Payment and Access Commission (MACPAC), “Chapter 5: Design Considerations for the Future of Children’s Coverage: Focus on Affordability,” March 2016 Report to Congress on Medicaid and CHIP. Note: Eligibility levels do not include the mandatory 5% income disregard. Conception to birth coverage is also offered under the CHIP unborn child option.

**Benefit Package:** States that operate Medicaid expansion CHIP programs must follow Medicaid rules, including providing all Medicaid covered benefits to enrolled children. In separate CHIP programs, states have substantial flexibility in designing CHIP benefit packages within broad federal guidelines. In addition to general medical and dental benefits, other benefits offered in Louisiana’s CHIP program include (but are not necessarily limited to):

- Inpatient and outpatient behavioral health services
- Physical and occupational therapy
- Vision exams and corrective lenses
- Services for speech, hearing, and language disorders
- Hearing exams and hearing aids
- Durable medical equipment

<sup>1</sup> The increased federal CHIP matching rate began in FY2016; states’ federal matching rates currently range from 88 to 100 percent.

<sup>2</sup> Information in this fact sheet has been verified by the state.

<sup>3</sup> Genevieve Kenney et al., Children’s Coverage Climb Continues: Uninsurance and Medicaid/CHIP Eligibility and Participation Under the ACA. May 2016.

<http://www.urban.org/sites/default/files/alfresco/publication-pdfs/2000787-Childrens-Coverage-Climb-Continues-Uninsurance-and-Medicaid-CHIP-Eligibility-and-Participation-Under-the-ACA.pdf>

**Delivery System:** The delivery system and provider network is the same in LaCHIP and Medicaid for all children. It is a managed care system called Healthy Louisiana. Enrollees choose coverage from one of five participating plans. These plans differ in their provider networks, referral policies, health management programs and extra services and incentives offered.

**Premiums & Cost Sharing:** Within federal parameters, states can set CHIP program premium and cost sharing levels. In total, any family contribution to the cost of coverage cannot exceed five percent of family income annually.

### Premiums and Selected Cost Sharing in LaCHIP, 2016

Family Income Level	Premiums	Office Visits	Inpatient Services	Prescription Drugs
213-250% FPL	\$50 per family	None	None	None

### Strategies to Simplify Enrollment and Renewals Implemented in Louisiana

Strategy	Used
Use of presumptive eligibility	No
Use of 12-month continuous eligibility	Yes
Use of express lane eligibility	No
Premium assistance	No <sup>4</sup>

The ACA required states to implement the following strategies beginning January 2014: eliminating in-person interviews, removing asset tests, creating joint application and renewal forms, and adopting automatic/administrative renewals. For definitions of strategies in this chart, see the Centers for Medicare and Medicaid Services December 2009 State Health Official letter, available at <https://downloads.cms.gov/cmsgov/archived-downloads/SMDL/downloads/sho09015.pdf>

**Other Program Characteristics:** Below are some other key program characteristics of LaCHIP.

Does Louisiana...	
Require a waiting period? <sup>5</sup>	Yes, 3 months only if >212% FPL
Offer a buy-in option? <sup>6</sup>	No
Cover dependents of public employees? <sup>7</sup>	No <sup>8</sup>
Cover lawfully residing children without a five-year waiting period? <sup>9</sup>	No

**Quality Measures:** States may report on a "[core set](#)" of quality measures for children. Louisiana reported on 18 measures for federal fiscal year 2014. Among the measures is access to primary care providers, listed below.

### Percentage of Children and Adolescents Visiting a Primary Care Provider, by Age (FFY 2014)

	12-24 month	25 months – 6 years	7-11 years	12-19 years
Louisiana	92.4%	80.9%	83.5%	81.8%

Source: Department of Health and Human Services, *2015 Annual Report on the Quality of Care for Children in Medicaid and CHIP, February 2016*. The measure is for the percentage of children ages 12 to 24 months and 25 months to 6 years receiving a visit to a primary care provider within the past year; and every two years for children ages 7 to 11 years and 12 to 19 years. Note: These data include both Medicaid and CHIP.

<sup>4</sup> Louisiana terminated its premium assistance program effective 11/30/15; however the state is considering reestablishing it in 2017.

<sup>5</sup> States may implement waiting periods up to 90 days in CHIP. A waiting period is the length of time a child must be uninsured before enrollment in CHIP.

<sup>6</sup> States can allow families with incomes above the upper income eligibility limit to pay the full cost to purchase coverage for their uninsured children through CHIP.

<sup>7</sup> CHIPRA provided states the option to cover the income-eligible dependents of state employees under CHIP.

<sup>8</sup> The state indicated that dependent coverage for public employees is available through Medicaid expansion LaCHIP but not the separate CHIP program.

<sup>9</sup> CHIPRA provided states the option to remove the five-year waiting period for lawfully residing children.
