Is It Safe for States to Import Drugs from Canada? Yes, Here’s Why

80% of active ingredients used in the manufacture of drugs in the US are imported.

Drug manufacturing is already global.

More than 30 Canadian drug manufacturers are FDA-registered to produce drugs for US markets.**

Wholesale drug importation from Canada allows states to access a less expensive global drug market.

A licensed wholesaler can help a state implement a wholesale importation program to ensure product safety.

Safety standards are comparable: Federal regulations already ensure the safety of foreign-produced drugs entering the US market.

EU regulatory inspections of drug manufacturing facilities in Europe meet US safety standards.***

Wholesale drug importation from Canada allows states to access a less expensive global drug market.
