

ABCD Healthy Beginnings Evaluation

Lessons Learned – Pilot Communities

The purpose of this interview is to learn more about your experience with the ABCD project. We are interested in learning about your successes and challenges over the last year. In the first part of the interview, we'll focus on questions related to promoting social-emotional development in children age 0-3. In the second part of the interview, we'll focus on questions related to maternal depression among new mothers.

Social-Emotional Development of Children 0-3 years of age

1. In your role as _____, what have you learned about promoting social and emotional development in primary care for young children age 0-3?
2. What, if any, benefits have you perceived to children? Families? Doctors and other Health Care providers?
3. What has been the easiest part of developing and implementing a model of care for social-emotional development of children age 0-3 in your community/at your medical practice?
4. What has been the most challenging part of developing and implementing a model of care for social-emotional development of children age 0-3 in your community/at your medical practice?
5. What has surprised you about developing and implementing a model of care for social-emotional development of children age 0-3 in your community/at your medical practice?
6. If you could start over again with developing and implementing a model of care for social-emotional development of children age 0-3 in your community/at your medical practice, would you do anything differently? If yes, what would you do differently and why? If no, what would you do the same and why?
7. If you were providing technical assistance to another community/medical site that wanted to develop and implement a model of care for social-emotional development of children age 0-3 in your community/at your medical practice, what advice would you give them?
8. What advice do you have for the ABCD Healthy Beginnings leadership team as they work with other communities/medical practices to promote the social-emotional development of young children?

Maternal Depression among New Mothers

1. In your role as _____, what have you learned about addressing maternal depression with new mothers?
2. What, if any, benefits have you perceived to children? Families? Doctors or other Health Care providers?
3. What has been the easiest part of developing and implementing a model of care for maternal depression among new mothers in your community/at your medical practice?
4. What has been the most challenging part of developing and implementing a model of care for maternal depression among new mothers in your community/at your medical practice?
5. What has surprised you about developing and implementing a model of care for maternal depression among new mothers in your community/at your medical practice?
6. If you could start over again with developing and implementing a model of care for maternal depression among new mothers in your community/at your medical practice would you do anything differently? If yes, what would you do differently and why?
7. If you were providing technical assistance to another community/medical site that wanted to develop and implement a model of care for maternal depression among new mothers, what advice would you give them?
8. What advice do you have for the ABCD Healthy Beginnings leadership team as they work with other communities/medical practices to address maternal depression among new mothers?
