

### Illinois Healthy Beginnings

Please answer the following 10 questions about social/emotional issues for children and maternal depression. Circle if you think each statement is true or false. Your responses will remain confidential.

**PRETEST**

True False

1. If a child's score falls on, or just above, the designated cutoff score on the Ages and Stages Questionnaire: Social/Emotional (ASQ: SE), a referral for additional assessment is not necessary.

True False

2. A provider must consider a parent's perspective when assessing a child's behavior.

True False

3. The Illinois Department of Public Aid (IDPA) will reimburse providers for the use of the ASQ:SE screening tool if the child receives KidCare (Medicaid).

True False

4. About 10% of new mothers will experience the "Baby Blues."

True False

5. About 50-80% of new mothers will experience postpartum psychosis.

True False

6. Maternal depression can begin during pregnancy.

True False

7. If a new mother does not show any risk factors for depression, you do not need to take time to do a screening with her.

True False

8. The Edinburgh Postnatal Depression Scale can only be offered to mothers following the baby's birth.

True False

9. Parents generally give accurate and quality information about their child's development and behavior.

True False

10. Only parents can make a referral call to Child & Family Connections.
